EDUCATION

Kennesaw State University – Kennesaw, GA

Bachelor of Science in Cybersecurity; Minor in Computer Science

Expected May 2027 | GPA: 3.62

Relevant Coursework: Computer Organization & Architecture, Linear Algebra, Database Systems, Calculus II, Client Systems Security, Network Security, Linux & Unix Administration

EXPERIENCE

Network Engineering Intern

Emory University | May 2026 – Present

- Collaborate with network engineers on switch and chassis swaps, including device configuration and port provisioning, across both university and healthcare environments
- Support edge (EDG) refresh initiatives by racking, stacking, and deploying network hardware in academic and clinical facilities
- Assist in the installation and configuration of wireless access points (APs) to upgrade network coverage for campus and Emory Healthcare sites
- Terminate and punch down RJ45 connections and keystone jacks to support structured cabling standards
- Configure VLANs and apply IP addressing and subnetting to support network segmentation and device deployment

Data Cable Technician

Georgia Technical Services | May 2025 - August 2025

- Terminate Ethernet cables with RJ45 connectors (Cat5e/Cat6) ensuring high-quality signal performance.
- Perform punchdown on patch panels and keystone jacks using 110/66 blocks.
- Pull and route structured cabling through ceilings, walls, and conduits in commercial/industrial environments.

TECHNICAL PROJECTS

Network Engineering Homelab Setup – Independent Project

- Designed and implemented a physical network lab with a Cisco router(2811) and two switches (3550, 2960).
- Configured static and dynamic routing protocols (RIP, OSPF) for inter-network communication.
- Deployed VLANs and inter-VLAN routing to improve traffic management.
- Simulated WAN links with private IP addressing (10.0.0.0/30) to emulate enterprise networking. Tested and troubleshot configurations to strengthen practical networking skills.

Python Network Automation Lab – Independent Project

- Developed a Python script using Netmiko to automate Cisco router configurations over SSH.
- Scripted tasks including IP assignment, interface enabling, and saving configurations for streamlined setups
- Built experience with network device CLI, SSH connectivity, and Python-based automation.

ADDITIONAL

Technical Skills: Java, Python, SQL, PC Troubleshooting, Operating Systems (Linux, Windows), Routing & Switching, Network Troubleshooting, IP Addressing & Subnetting, Cisco Networking

Soft Skills: Dependable, Critical-Thinking, Collaborative, Attention to Detail, Problem-Solving, Fast Learner, Customer Support

Certifications: Cisco's Introduction to Cybersecurity
